Security Information

MEMORANDUM FOR: Secretary of Defense [alternatively: The NSC]  
SUBJECT: Unidentified Flying Objects (Flying Saucers)

1. The IAC has reviewed the current situation concerning unidentified flying objects which have caused extensive speculation in the press and have been the subject of concern to Government organizations. The Air Force within the limitations of manpower which could be devoted to the subject has time for carrying the full responsibility for investigating and analyzing individual reports of sightings. Since 1947, approximately 1500 official reports of sightings have been received and, of these about 20% are as yet unexplained.
2. It is my view and that of the IAC that this situation has possible implications for our national security with respect to the vulnerability of the U.S. to air attack. Intelligence, however, cannot discharge its responsibilities with regard to estimating the capabilities of an enemy to create and use such phenomena against the U.S. unless we first determine through scientific research whether or not such phenomena can in fact be generated and controlled by humans.
3. It is therefore recommended that the Department of Defense (to directed to) undertake an expanded scientific research program to reveal the nature of the various phenomena which are causing these sightings and means by which these phenomena may be identified immediately. It is also recommended that in such a project there be close cooperation between those conducting the research and scientific and technical intelligence research.

The IAC agencies are prepared to do their part in such a project.

~~INTELLIGENCE ADVISORY COMMITTEE~~

Flying Unidentified Objects (Flying Saucers)

[alternatively: the NSC]

1. Attached is a proposed letter to Secretary Lovett, from the DCI recommending the initiation of fundamental scientific research with respect to the nature and causes of unidentified Flying objects (Flying Saucers).  
[alternatively: the NSC]
2. While it is recognized that the implications of Flying Saucers are of primary concern to the Defense Department in carrying out its responsibility to defend the United States, it is also believed that intelligence must request of appropriate authority such assistance as it needs to carry out its responsibility. It is believed that the scientific research required and the intelligence research contingent thereon can be most fruitful if they go hand in hand.
3. Recommendations:
  - a. That the IAC concur in the proposed letter to the Secretary of Defense.
  - b. That the IAC request the Hatch Committee to give close attention to indications which may reflect Russian actions are being taken with respect to or on the basis of cognizance of Flying Saucers or with respect to the state of United States public opinion in respect of Flying Saucers.
